

My way of bringing different educational experiences and research together.

Topic - food

- Details
- Lunches will have multiple options (Constant salad bar, sandwich line hot and cold, vegetables, etc.)
- Vegan options
- Gluten free options
- Portion control
- Reduced lunch students will be able to get whatever food they want
- Lunches will cost \$2.30
- Water bottles are free
- Lunch is 45 minutes long
- Lunch is so important because it affects the way students feel and how productive they are. If lunch was cut too short then students would be rushing and scarfing down food and then they won't feel well afterward, if lunch was too long then students might lose productivity for the day. Schools also need to worry about the food that's given to the kids, not every kid will be happy with everything but there should be a variety of food everyday for students to choose from, hot and cold sandwich line, salad bar, pizza etc. |

Topic - education standards

- Details
- Every student must take a home economics class (at least once)
- Every student will be educated on sex and human intercourse
- If a student has a mental disorder their classes and teachers must accommodate the student, only if they need a doctor's note and is given to the nurse.
- Every student must take 4 English classes
